1. Project Management

- We used the **github projects** for our tasks;

| | Collection | Database | Understanding | Modelling | Evaluating | Emails | Interface |
|---------|------------|----------|---------------|-----------|------------|--------|-----------|
| Gonçalo | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| Mahak | ✓ | ✗ | ✓ | ✓ | ✓ | ✗ | ✗ |
| Pranshu | ✓ | ✗ | ✓ | ✓ | ✓ | ✗ | ✗ |
| Tapas | ✓ | ✓ | ✗ | ✗ | ✗ | ✗ | ✓ |

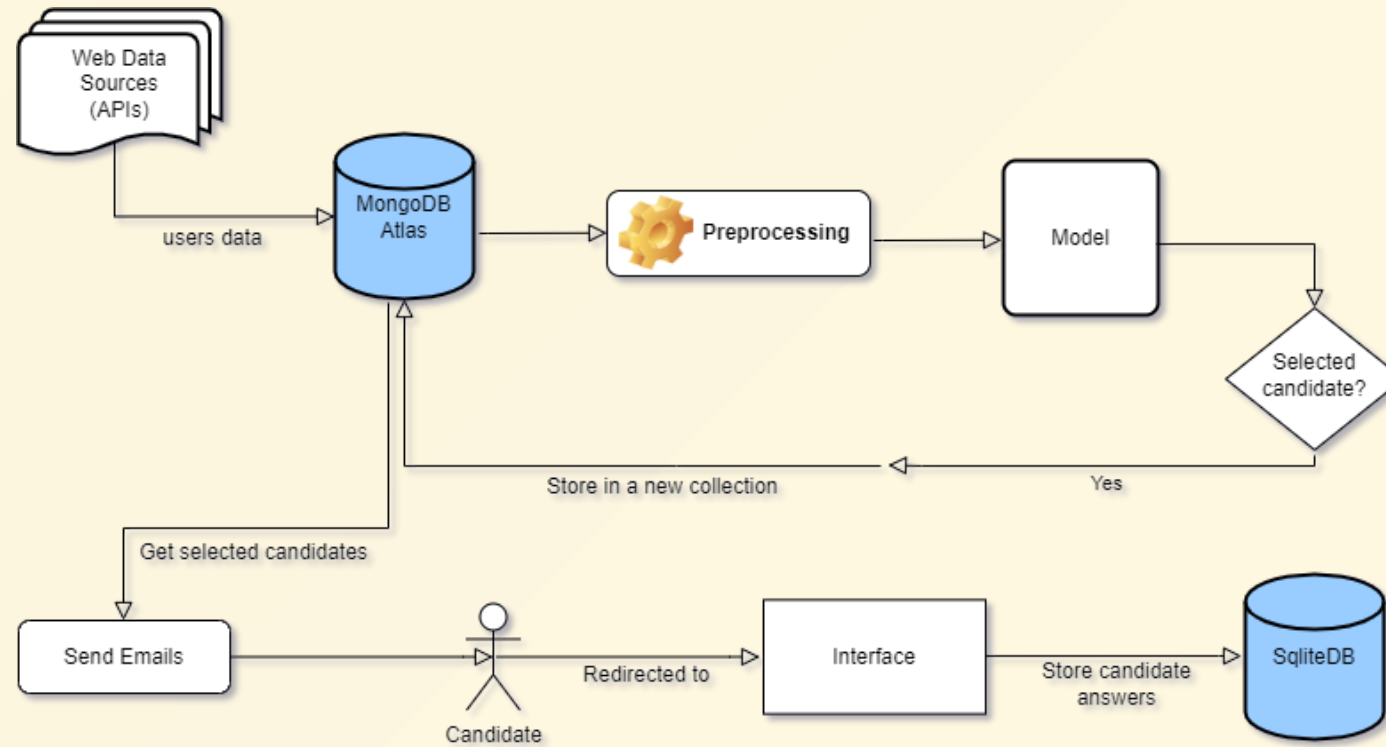

Legend:

✓ → responsible; ✓ → helped; ✗ → not involved.

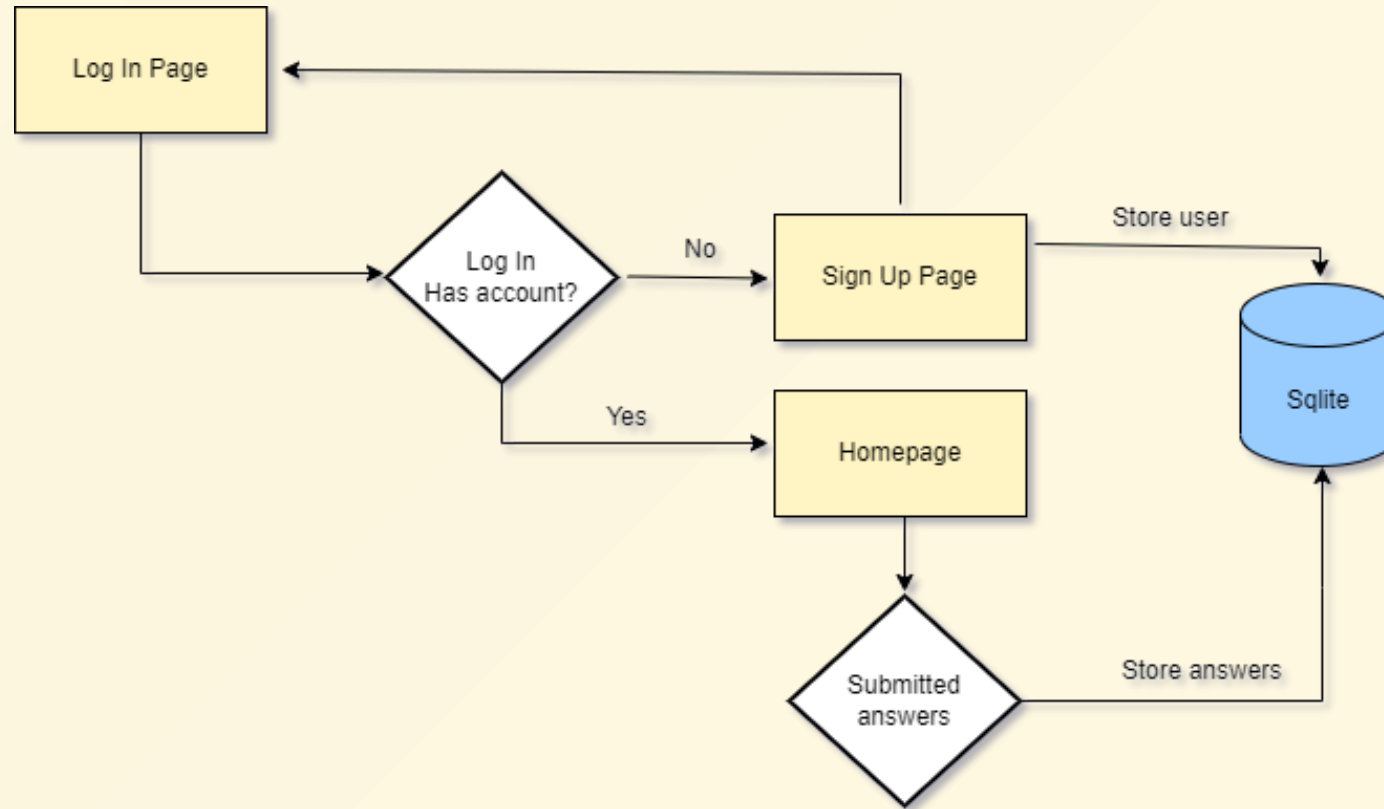

Our kanban board on github:

2. Design of the application

Interface:

3. Current status

| Stages | Collection | Database | Understanding | Modelling | Evaluating | Emails | Interface |
|--------------|------------|----------|---------------|-----------|------------|--------|-----------|
| Pipeline | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| Improvements | ✗ | ✓ | ✓ | ✓ | ✓ | ✓ | ✓ |
| New features | ✗ | ✗ | ✗ | ✗ | ✗ | ✗ | ✗ |

Legend:

✓ → done;
✓ → partially done;
✗ → not done.

4. Demo

5. Improvements

- Select candidates from more data sources;
- Have a code coverage of 80% for unit tests;
- Connect both databases;
- Have a page in the interface for the recruiting manager to access the answers;
- Be able to email the candidates directly from the interface;
- Landing page thanking candidates for the submission;
- More appealing timer.

6. Q&A
